Doctor: DR. JOHN MOUNGER

CARE FOR YOUR PET FOLLOWING SPAY OR NEUTER

Your pet has undergone surgery and will experience some degree of trauma. The following will help answer the most common questions that arise after these operations. An animal's pain threshold is much higher than a human's; therefore, animals do not exhibit as much discomfort following surgery. **DO NOT ALLOW EXCESSIVE PLAYING, JUMPING OR RUNNING. THIS MAY DELAY THE NORMAL HEALING PROCESS.**

RECOVERY:

Each animal recovers from anesthesia at a different rate. Some animals are back to normal within 24 hours, while others may take as long as three to four days to recuperate. Your pet will not be discharged from the hospital if he or she is unable to walk out; however some animals may still stagger slightly upon release. Your pet will recover from surgery faster if the convalescent time is spent at home. **SPAYED DOGS AND CATS SHOULD BE CONFINED INDOORS AND NOT BATHED UNTIL THE INCISION IS HEALED.**

FEEDING:

DO NOT FEED YOUR PET FOR AT LEAST THREE HOURS AFTER RETURNING HOME, AND LIMIT WATER TO THREE TO FOUR TABLESPOONS EVERY 20 MINUTES DURING THIS TIME.

THE INCISION:

CHECK THE INCISION AT LEAST ONCE DAILY.

* Animals will often lick at the site of the incision. This can be a result of itching from being closely shaven or irritation from the suture material. A belly band can be applied over the incision of females. A restraint collar can also be used if needed.

* A small amount of hemorrhage, or swelling, will occasionally occur at the incision site. This occurs when blood pools under the skin. When the animal moves, a drop or two may discharge through the sutures. If bleeding is excessive or continues for more than 24 hours, please notify us.

* Occasionally a hard lump will appear at the site of the incision. This is often a reaction to the suture material or can be a result of blood pooling under the skin. If it gets noticeably larger, please call us.

SUTURES: absorbable

Doctor: DR. JOHN MOUNGER

THE USE OF AN ELIZABETHEAN COLLAR IS NECESSARY TO PREVENT YOUR PET FROM
REMOVING SUTURES OR EXCESSIVELY LICKING OR SCRATCHING A WOUND OR INCISSION
SITE.

IT IS IMPARATIVE THAT THE E COLLAR BE PROPERLY FITTED AND USED.

IF THE E COLLAR IS NOT USED AND YOUR PET DOES DAMAGE TO ITSELF IT CAN BE VERY
DIFFICULT AND EXPENSIVE TO REPAIR.

ANIMAL TRANSFER (S) TO APPROVED AGENCIES

Date: 8-20-2012

Staff Tamra Belarmin

All animals have been held the required time.

Agency Name Florida Chinese Shar Pei Rescue
Address 5574 NW 99th Ter
Agency Representative Kristina Taylor
Phone Number 352-348-1234

Intake # 's 33348
Intake # 's _____

Sumter County Animal Services does not guarantee the health of any animal rescued from the kennel. We have no health records or history of the animals that come into the kennel. The Animal Services shelter receives animals from various sources that may have exposed them to contagious diseases. Due to varying incubation periods, symptoms may not be apparent at the time of transfer.

We advise the agency to take the pet (s) to a licensed veterinarian within 3 days for examination and treatment if needed.

I understand the above conditions and agree to indemnify and hold harmless Sumter County Animal Services, the Board of County Commissioners, and their agents or employees, against all claims, liabilities, or suits of any nature whatsoever arising out of, because of, or due to the health concerns of the animal(s) listed above rescued from Sumter County Animal Services.

Representative Signature Kristina Taylor
