Dear Frank,
Things to consider

* ① Culture feces (expensive) ##
to look for Salmonella, E. coli, etc)

* ② Use of prednisone (severe inflammatory disease; protein loosing enteropathies)

** ③ Doing bloodwork → chemistry/CBC (in house)
→ Intestinal absorption panel ##
→ Exocrine pancreatic insufficiency $
→ ACTH stim test - Addison's ##

** ④ Changing diet to hypoallergenic type and feeding that exclusively (Z/D, Rabbit/peas, etc)

⑤ Biopsies of intestinal tract to rule out neoplasia (cancer) and inflammatory conditions ##
(Depends if he's in physical condition to tolerate surgery
