### Doctor's Instructions

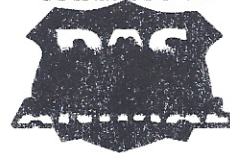

#### **Immiticide 45-66 lbs.**

Heartworm disease is very serious and complications may arise during and after treatment. Please follow these instructions carefully to lessen the chances of problems developing.

- 1) Exercise: Hannah's activity must be severely restricted for the next 5 weeks. Short, on-leash walks are the only exercise allowed until both phases of the treatment have been completed. Also, prevent Hannah from engaging in vigorous or extended barking, rough play or other excitement.
- 2) Please notify the hospital if any of the following occur:  
Hannah refuses to eat normally.  
Hannah has diarrhea, vomiting or blood in the urine.  
Hannah coughs frequently or has trouble breathing.

## This DOG - ID#A151554

I am an unaltered female, brown  
 Chinese Sharpei mix.

The shelter thinks I am about 3 years  
 old.

I have been at the shelter since Jan 27,  
 2012.

This information is less than 1 hour old

For more information about this animal, call:  
Collier County Domestic Animal Services at (239)

POST-OPERATIVE INSTRUCTIONS

1. No running, jumping, playing, swimming or other strenuous activity for 7 to 10 days. Keep your pet quiet. Pets must be kept indoors where they can stay clean, dry and warm. No baths during the recovery period. Dogs must be walked on a leash and cats kept indoors.
2. Check the incision site twice daily. There should be no drainage. Redness and swelling should be minimal. Do not allow your pet to lick or chew at the incision. If this occurs, an Elizabethan collar MUST be applied to prevent it.
3. Appetite should return gradually within 24 hours of surgery. Lethargy lasting for more than 24 hours post-op, diarrhea, or vomiting are not normal and your pet should be taken to your regular veterinarian. Dogs may have a slight cough for a few days after surgery.
4. Do not change your pet's diet at this time and do not give junk food, table scraps, milk or any other people food during the recovery period. This could mask post-surgical complications.
5. We recommend your pet receive a post-operative examination with your regular veterinarian 7 to 10 days after surgery. Have the incision checked for complete healing, to remove any skin sutures, and to discuss additional needs, follow-up care and vaccination boosters.
6. If there are any questions or concerns directly related to the surgery during the recovery period, please call this office at (239)514-7647. If there is an emergency after hours, contact your regular veterinarian or the Emergency Pet Hospital at (239)263-8010.
7. Your pet received a green tattoo next to their incision. This tattoo is a scoring process in the skin; IT IS NOT AN EXTRA INCISION.

Collier Spay Neuter Clinic will treat at our clinic, at minimal cost, any post-op complications resulting directly from the surgery, if the above post-op instructions are followed in full. Your regular veterinarian must address illnesses or injuries that are not a direct result of surgery. Please call for an appointment as soon as you see cause for concern. We cannot be held responsible for complications resulting from failure to follow post-op instructions, or for contagious diseases for which the animal was not previously properly vaccinated.

☒ Spay

☐ Neuter

☐ Already Neutered

☐ Already Spayed

☐ In Heat

☒ Pregnant 1st

☐ Cryptorchid

Ovariohysterectomy - unless otherwise noted, there are no sutures to remove

Castration - unless otherwise noted, there are no sutures to remove

Please contact this clinic if you notice signs of undescended testicles

Please contact this clinic if you notice signs of heat

Please keep away from intact males for at least two weeks

Unless otherwise noted, there are no sutures to remove

Undescended testicle(s), your pet has two incisions

Our veterinarians recommend that you establish a wellness program for your pet with a regular, full-service veterinarian.

For safe flea control, our veterinarians recommend Frontline or Advantage. Over-the-counter flea and tick treatments and collars are ineffective and may be harmful to your pet.

Please see your regular veterinarian to address the following concerns about your pet:
