Doctor's Instructions

Fecal w/ wellness exam

Ingrid should have a stool sample microscopically examined once every 12 months or if signs of gastrointestinal upset to rule-out any intestinal parasites. This is important not only for Ingrid, but also for you, because many of the intestinal parasites that Ingrid may have can also infect you or your children. Just drop off a fresh sample and we will call you with the results if you cannot wait.

Should you need emergency veterinary care after office hours please call AA Emergency in Palm Harbor at 787-5402.

Doctor's Instructions

Otitis Externa - Bilateral

Otitis externa is inflammation of the external ear canal that begins at the outside of the ear and extends inward to the eardrum. Causes include bacteria, yeast, ear mites, wax accumulation, thick or matted hair in the canal, impaired drainage, infections or allergies from elsewhere in the body.

In some cases, your pet's ears maybe too painful for routine cleaning, and it may be necessary to sedate Ingrid in order to thoroughly clean the ear canal. The longer the infection has been present, the more difficult it is to clear up. In severe long-standing infections, surgery may be necessary to correct the problem.

To be effective, the medication must contact microorganisms or mites deep

in the ear canal. To achieve this contact, the canal must be clear of debris and the medication must be placed in the ear as directed.

Please call us if you cannot medicate your pet's ears, your pet continually scratches its ears, shows other signs of illness during treatment, or the infection recurs after apparent recovery.

BIOHAZARDOUS Disposal charge

Ingrid's visit generated biomedical waste that will need to be disposed of according to State and Federal Law. Examples of biomedical waste include: needles, syringes, scalpel blades, vials, and other like items.

Kennel Cough(Bordetella)6month

Ingrid received a Bordetella/Parainfluenza (Kennel Cough) vaccination today. This vaccination is required when Ingrid visits our boarding facility, or spends the night at another boarding location. It is also recommended when your pet goes to the groomer's or other locations that houses dogs. This is a 6 month vaccination.

DA2PP

This annual vaccination protects Ingrid from highly contagious diseases. These viruses are found everywhere and can cause Ingrid to become deathly ill. It is important that you have Ingrid vaccinated annually for adequate immune protection.

Should you need emergency veterinary care after office hours please call AA Emergency in Palm Harbor at 787-5402.

Chief Complaint: dapp and ken vax boosters (per MCS on last visit) (Trifexis?), - R ear has a lot of discharge, flushing every other day, everything else going well, eating/drinking good, no vomiting or diarrhea

Assessment:

Ears: AU- moderate dark brown discharge (AD worse than AS) very narrow canals
Normal: Skin / Coat, Eyes, Mouth / Teeth, Heart, Respiratory, Musculo-Skeletal, Lymph Nodes, Gastrointestinal, Nervous System, Genital / Urinary

BAR

Gave DAPP vaccine SQ over L hind
Gave Kennel Cough vaccine SQ over L hind

Diagnosis / Rule Outs:

Otitis Externa - Bilateral

Plan / Treatment:

DA2PP
Kennel Cough(Bordetella) 6 month
OSHA BIO-Med Waste Disposal
Wellness Exam
Prednisone 10 mg

Client Instructions:

- 1.) We will continue treating Ingrid for an ear infection. Please start back on the Posatex - once daily in each ear - for the next 14 days.
- 2.) Please start the oral Prednisone (steroid) to reduce inflammation and open up the ear canals. Continue as directed until gone.
- 3.) Continue flushing the ears every other day.
- 4.) Re-check ears in 14 days.
