SURGERY: CANINE OVARIOHYSTERECTOMY

Anesthesia:
IM Domitor 1 mg/ml at 0.025 mg/kg, Ketamine 100 mg/ml at 2.5 mg/kg, Torbi 10 mg/ml at 0.25 mg/kg
Intubate, maintain on isofluorane and O2
Pen G 300,000 u/ml at 0.1ml/lb SQ pre-op
Rimadyl 50 mg/ml at 2 mg/lb SQ pre-op

Sx:
Ventral midline incision; removal of both ovaries and uterine horns follwing litation of ovarian pedicles and uterine body (one circumferential and one transfixing for dogs greater than 30 lbs) with Polyglactin or Polydioxanone suture. Body wall closure with simple interrupted suture pattern, followed by subcutaneous and/or intradermal closure with simple continuous suture pattern, with Polyglactin or Polydioxanone suture. Cyanoacrylic adhesive may be applied to skin surface. Tattoo ink aseptically applied to incision.

Routine recovery.

P: Recommend restricted exercise (no running, jumping, or horseplay) for 10 days; keep incision clean and dry and inspect twice daily until healed. Discourage chewing/licking at incision; if noted, an Elizabethan collar is recommended.

MEDICAL/BEHAVIORAL DISCLOSURE

The pet listed above was examined by Miami Dade Animal Services Veterinary Staff and determined to have the following medical and/or behavioral conditions:

10/6/2011
PARASITES

*** Please refer to Medical History Report for additional information. ***

I have received full disclosure of the medical condition(s) detected upon evaluation of the pet I am adopting, and understand that other medical conditions may exist but may not have been detected. I further understand that the treatment of the above mentioned condition(s) is my financial and legal responsibility, and this pet's prognosis is dependent on my pursuance of advanced medical and/or behavioral therapy. I consent to obtain veterinary care for the disclosed condition within 7 days of the adoption, and will submit proof of such care upon request. I release the Miami Dade Animal Services Department of all responsibility/liability.
